PRODUCT CATALOG

About Us

We care about people. On the basis of our sustainable development principles, with the awareness of respect to society and the environment; From production to marketing activities, from human resources to logistics, we adopt the principle of working for a healthy future.

We have gathered your every need with our wide range of products.

By following global technological developments closely, we offer you our high quality and economical product range. We analyze all the needs of the medical sector and offer fast and reliable solutions.

Our Mission

To produce solutions for the needs of the medical sector with the latest technology and high quality standards.

Our Vision

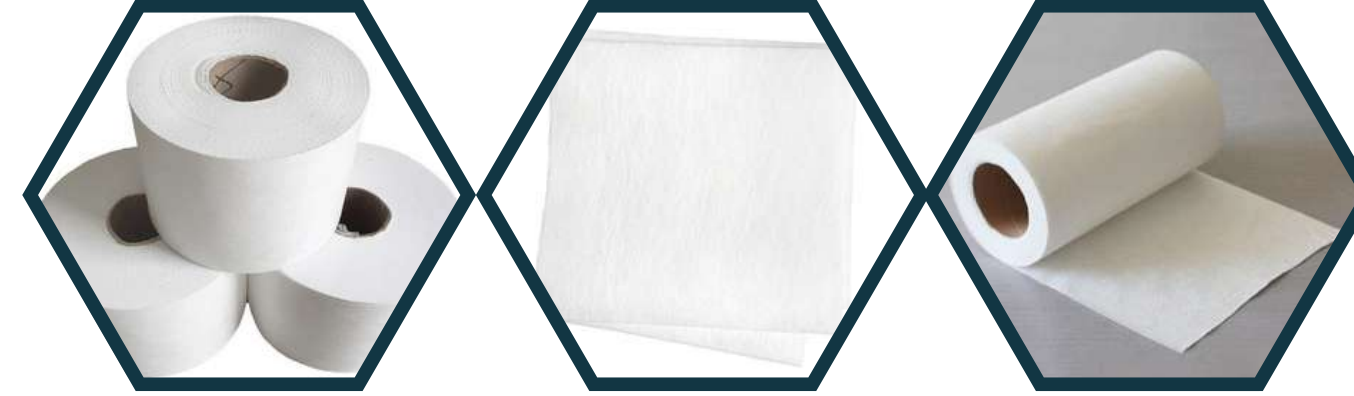

To be one of the leading medical textile companies in the country and the world.

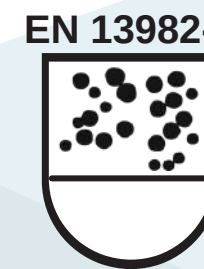

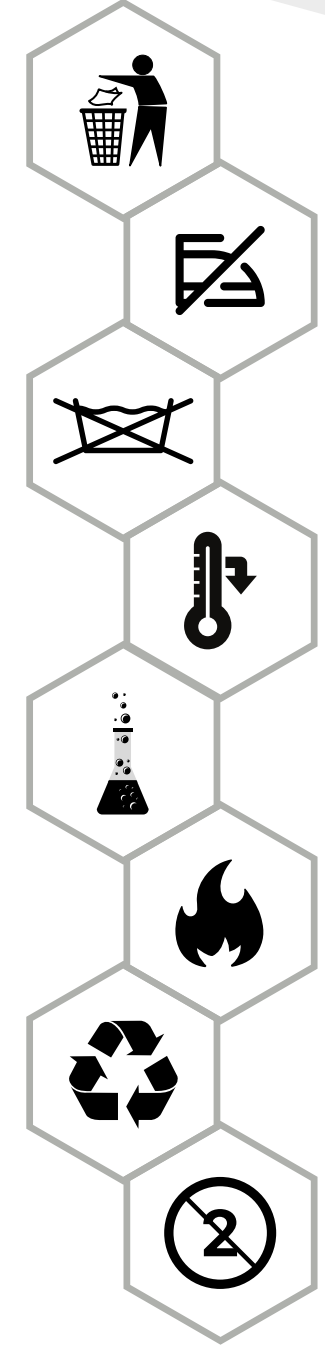

FABRICS

NANOSILVER TECHNOLOGY
MELTBLOWN FABRIC
BSM-001

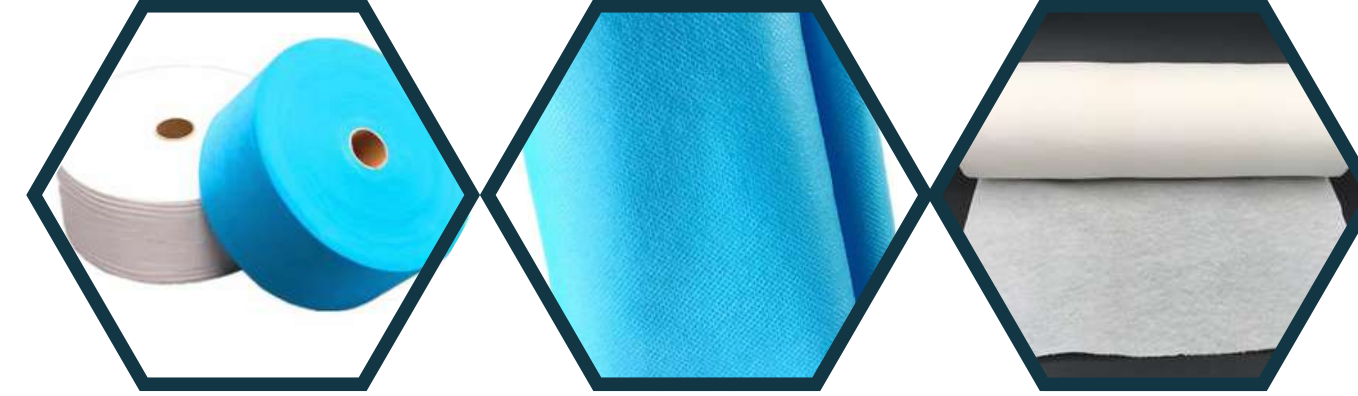

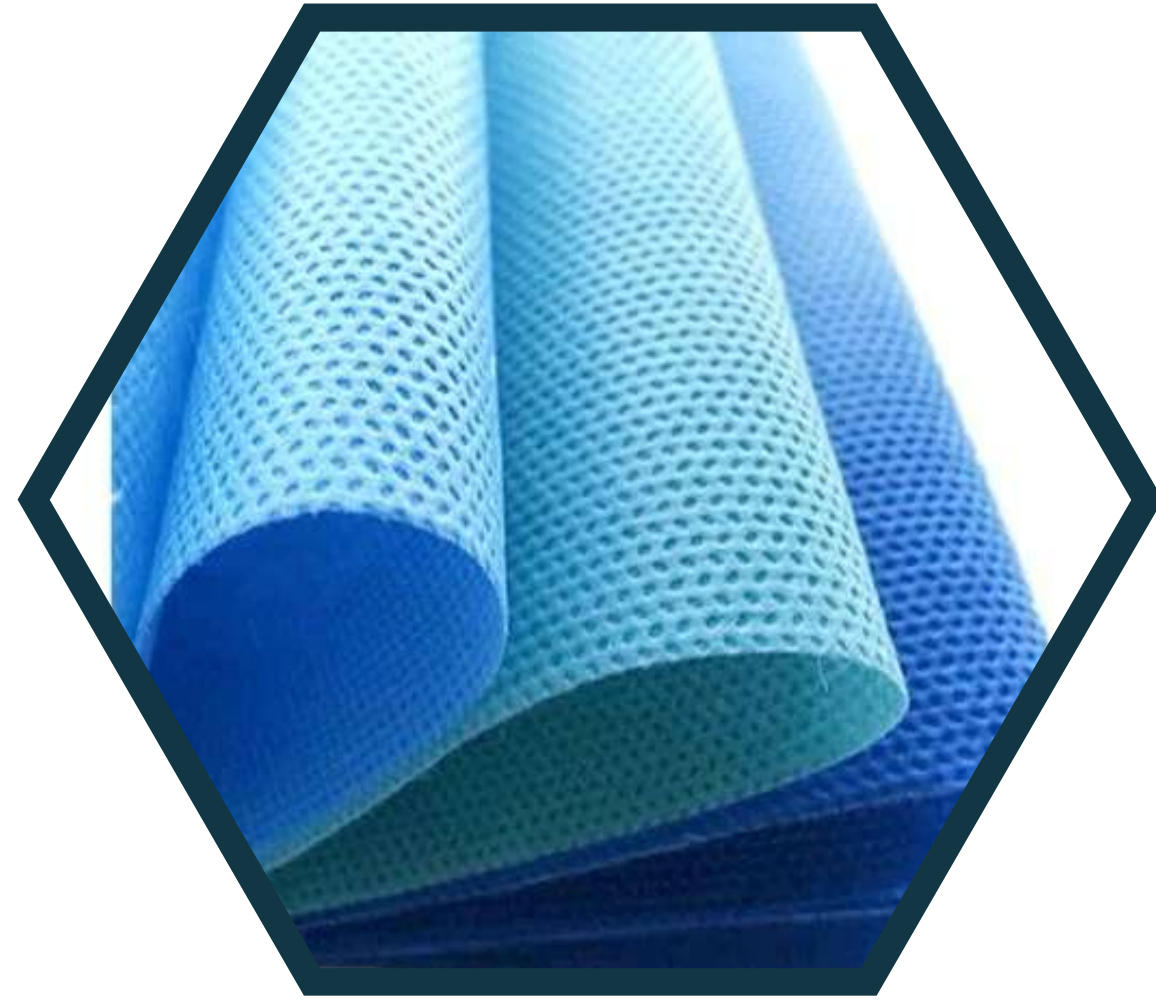

KEY FEATURES

Antiviral, Antifungal, Antibacterial.

MELTBLOWN BSM-002

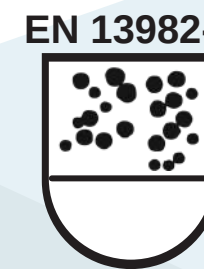

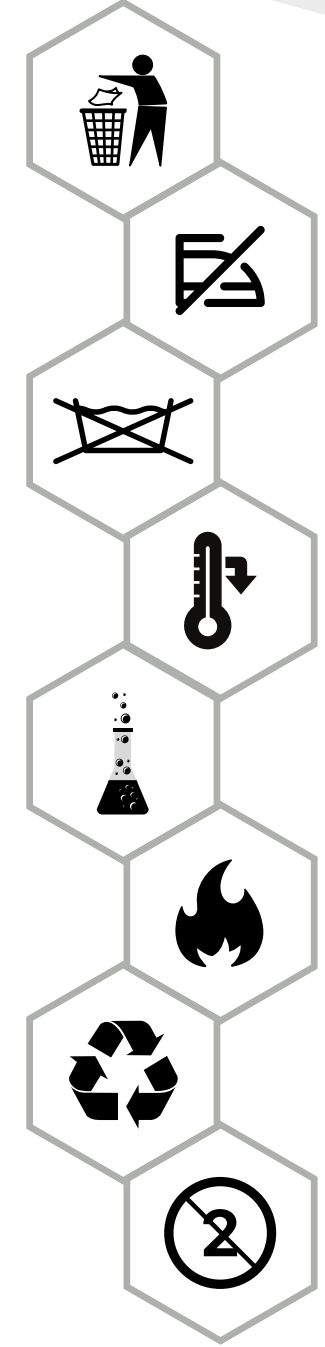

KEY FEATURES

99% BFE, 20 gsm up to 100 gsm.
Max fabric width 1600mm bobbin diameter, 800 mm with electrocharge unit+ electret compound.

Meltblown is produced from polypropylene just like spunbond fabric. Unlike spunbond fabric, it's produced with micro and nanofiber. This offers better filtering performance.

Up to the desired thickness, this product can be produced in weights of 10 - 500 grams.

N95 mask production meltblown technology is utilized during the manufacturing process.

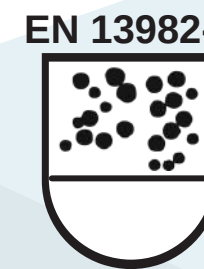

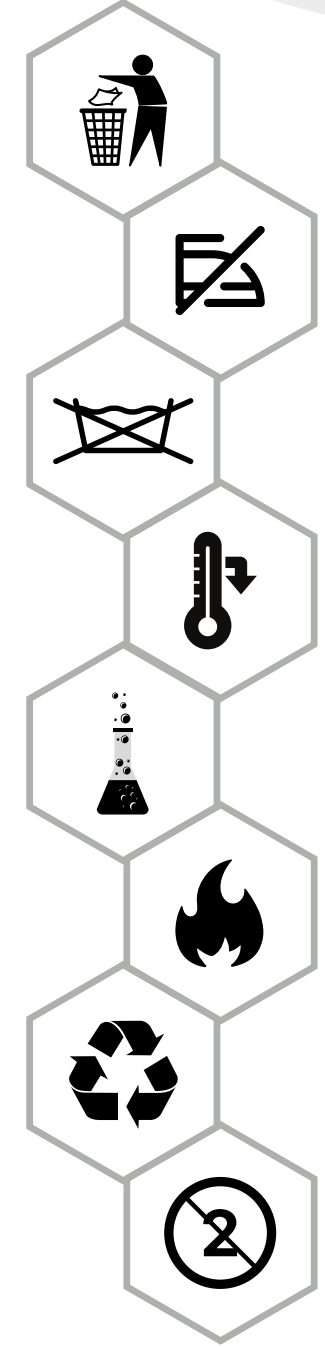

SPUNBOND BSM-003

KEY FEATURES

Polypropylene (PP) Hydrophobic, UV Resistance, Flame Retardant.

Spunbond is a polypropylene raw material produced fabric type. It is used in many different applications in the textile industry. This fabric is non-woven, It can protect its texture up to 90°C water and it is not affected by moisture. According to the desired thickness they can be produced in 8 – 200 grams.
